

Some useful tips for enhancing your study skills

1. When listening to lectures, you need to **take notes**. Thus being able to take concise and precise notes is an important skill.
2. Before attending a lesson, **prepare yourself** by reading something related to the topic to be taught. This will help you grasp the subject matter more easily.
3. Being able to **think critically** is essential. You need to learn to distinguish between facts and opinions.
4. When you give your opinions on a certain issue, you need to **support your arguments** with evidence.
5. You have to **listen to other people's opinions objectively** first before making your judgement.
6. Before submitting your work to the teacher, **edit it vigorously** to eliminate the mistakes and to check the details.
